OBJECTIVE

Dynamic and Proficient Front-End Developer with 5+ years of experience designing, building, and maintaining web applications, seeking full-time Front-end Developer. Have worked with multiple clients across various projects focusing on performance enhancement, responsive design and optimization

SKILLS

Programming Languages	HTML, CSS, JavaScript, Typescript
Libraries	React JS, React-Redux, Redux, Redux Toolkit, Next JS, React/Tanstack Query
Testing tools	Jest, React Testing Library, Cucumber, Cypress JS

WORK EXPERIENCE

FrontEnd Developer Global Logic	Aug 2024 - Current <i>Hyderabad, IN</i>
---	--

- Implemented the Next Gen Digital flow for client Verizon versus the existing Business as usual(BAU) flow Next Gen in a complete new tech stack - Next JS and Tanstack Query.
- Implemented E COM functionality for a user to keep shopping from the same point in the user journey after returning back within a time-span of 14 days using encrypted cookie.
- Reduced the **max load time for the application to 2 secs.**
- Worked on Page load optimization through **Indexed DB** approach to cater to multiple device load on the bundled screen to improved user experience.
- Delivered pixel perfect responsive design as per figma screens ensuring **improved user experience.**
- **Lead a team of 5 developers** from off shore towards successful and in time completion of assigned tasks, stories and defects.
- Worked pro actively with Backend Team in **API design discussion** and **contract finalization** to ensure reduced page load times as well as secured endpoints.
- Actively involved in **code review process** and **code commit strategies.**

Specialist Programmer Infosys Limited	Jul 2018 - Aug 2024 <i>Pune, IN</i>
---	--

- Worked on the building design and development of **subscription/retail product** of a MAANG tech giant.
- Developed and implemented **dynamic forms** for the application, ensuring alignment with both business and technical requirements.
- Implemented common **security patterns (e.g.: JWT)** and **performance patterns (e.g.: Lazy loading, Pre-Loading)** to improve performance.
- Implemented **access management(authorization) & user management** for the application through common HOC design pattern.
- Streamlined application development process by introducing **reusable components and custom hooks**, resulting in decrease in time spent on bug fixes and maintenance tasks.
- Optimized core web vitals via **Lighthouse analysis**, culminating in a 20% reduction in application load time.
- Following Behavior Driven Development practices. Writing unit tests using Cucumber and Cypress and helping define the overall testing strategy to achieve approximately 90% code coverage
- Developed real time change of Feature Flags through dev tools to test various retailers on-the-go.

- Involved in **technical analysis, UX discussion, User Interface design, API design discussions** and collaborating with the backend team to develop integrations that are both secure and performant.
- Spearheaded building application dashboard while emphasizing **cross-browsers compatibility and a mobile-first approach**.
- Conducted extensive testing and debugging across multiple browsers (Chrome, Firefox, Safari, Edge) to ensure consistent functionality and visual fidelity.
- Designed and implemented responsive layouts and components using CSS3, Flexbox and media queries, ensuring seamless user experience across various devices and screen sizes.
- Optimized front-end performance through code refactoring, caching strategies, and performance profiling techniques, resulting in faster load times and smoother interactions.

EDUCATION

Bachelor of Technology, Computer Science, West Bengal University of Technology, Kolkata 2014-2018
Y GPA - *8.25*
